

# SPECIFICATIONS

All specifications in this section were accurate at the time of printing. We reserve the right to change specifications or design without notice and without incurring obligation to install the same on products previously manufactured.

The wet and dry weights listed in the motorhome specifications are approximate weights only. The weight of your motorhome may vary considerably from those given, depending on optional equipment installed on your vehicle. A label attached to the inside of the wardrobe door gives the approximate weight of your vehicle including all options. Use this label for reference when loading the motorhome and weigh the vehicle on scales to determine the actual gross vehicle weight before venturing forth on a trip.

**IMPORTANT:**

Tank capacities listed in the charts are determined from the dimensions. Refillable capacities may differ from those given.
